SUMMARY

Data Analyst focused on transforming raw data into actionable business intelligence through SQL, Python, and advanced visualization. Developed comprehensive workforce analytics for eShram and built ML pipelines to predict user conversion behaviors. Certified in NPTEL Data Science for Engineers and OCI Data Science, with a strong foundation in statistical modeling and data-driven decision-making.

EDUCATION

BTech - Vignana Bharathi Institute Of Technology
CSE-Data Science, CGPA: - 7.34

2022-2026

Intermediate - Narayana Junior College, Hyderabad
MPC, Percentage:- 90%

2020-2022

WORK EXPERIENCE

Summer Intern – INCOIS (Indian National Centre for Ocean Information Services)

Apr 2025 – Jun 2025 | Pragathi Nagar, Hyderabad

- Enhanced backend performance of the Search and Rescue Aid Tool (SARAT) using Django, improving computational efficiency for rescue operations.
- Developed and refined frontend components to improve usability and data visualization.
- Refactored frontend-heavy logic by migrating JavaScript-based processing to backend (Django/Python), reducing client-side load and improving response time by ~25–30%.
- Collaborated on optimizing geospatial and calculation workflows, improving system reliability and response time

Tech Stack: Django, Python, HTML, CSS, JavaScript, MySQL, Apache HTTP Server

PROJECTS

Freemium2Premium – ML Conversion Prediction Model

- Built an end-to-end ML pipeline to predict free-to-premium user conversion, leveraging Logistic Regression, Decision Trees, and Random Forests with comparative performance evaluation.
- Conducted feature engineering and model selection to maximize predictive accuracy on behavioral and engagement data.
- Deployed an interactive dashboard for real-time prediction, data visualization, and business intelligence insights.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Streamlit, SQL, Matplotlib

E-shram Worforce Analytics Dashboard- [GitHub](#)

- Developed an interactive BI dashboard for data analysis and visualization of workforce demographics (gender, age, occupation, state-wise distribution).
- Implemented ETL processes, data cleaning, and SQL querying for efficient data transformation and reporting.
- Enabled real-time filtering, exploratory data analysis (EDA), and insight generation to support decision-making.

Tech Stack: Power BI, SQL, Python, Pandas, NumPy, Excel, DAX, Data Visualization, ETL, EDA, Streamlit

CERTIFICATIONS

- ServiceNow Certified System Administrator(CSA) and Certified Application Developer(CAD)
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- NPTEL-Data Science for Engineers

SKILLS

- Languages:** - Python, SQL, Java
- Technical Skills:** - Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, KPI Analysis, Data Modeling.
- Libraries & Frameworks:**- Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SciPy, Streamlit, Apache.
- Tools:** - Power BI, Tableau, Git, VS Code, Jupyter Notebook, Excel(Pivot Tables, VLOOKUP, Charts), Word, Microsoft Office, ServiceNow
- Soft Skills:** - Problem Solving, Critical Thinking, Teamwork, Adaptability
